

Illusion Telescopes

Illusion Optics are made by Optical Hardware, the specialist optics manufacturer and distributor based in Yorkshire. Illusion products are made without the brand name and resold under numerous brands. You can however buy Illusion products unbranded from a number of specialist retailers who pass on the savings made by not having to promote and advertise. Illusion offers top end optics at incredibly low prices.

All Illusion scopes have a built in retractable lens shade and standard tripod fitting. A standard case is included. Stay-on cases are available as an option.
