

To attach your telescope
to the 830 tripod
pull the release plate
lock

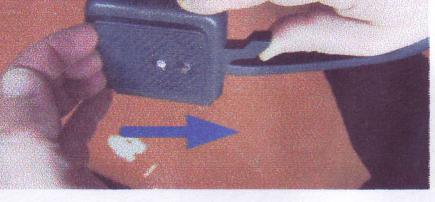

It is perfectly at home with many larger
scopes up to around 80-100mm objective
and larger magnifications of up to around
60X-70X however users will notice some
vibration at higher magnifications. You'll find
the 830 a handy to carry tripod for a larger
scope, even if it used on a heavier tripod
occasionally.

And lift out
the plate

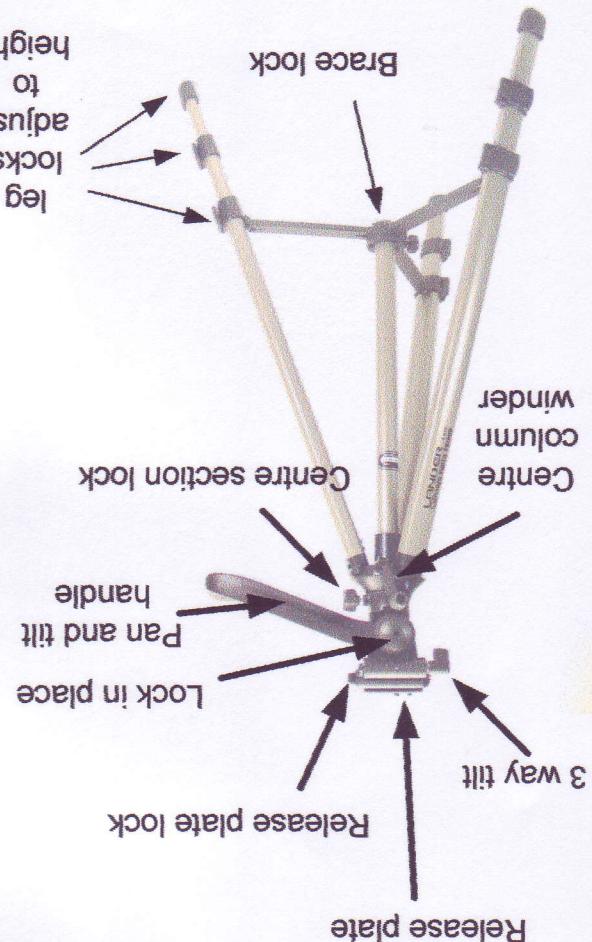

Slide the
release plate
backwards

Pull the
release plate
lock

lock

You'll find the 830 ideal for most spotting
scopes up to 60mm objective and working
up to around 30-40x magnification.
It is designed for light - medium weight
spotting telescopes and digital video
scopes up to 60mm objective and working
up to around 30-40x magnification.
The 830 tripod is a great all-round tripod.
It offers a combination of stability and
durability in a light weight body.
