- Length: T-80 50cm, T-90 55cm

T-80ED & T-90ED

T80-ED and T90-ED also feature ED glass, a special material which lowers chromatic aberrations and provides images with very high contrast, colour reproduction and sharp focus.

All Olivon scopes are supplied complete with stay-on case.

A great feature of these scopes is direct to tripod coupling with any Olivon Tripod, of course standard tripod bush is also included to fit to any common brand of tripod.

The Olivon camera adaptor is a multipurpose digiscoping and standard photo converter. It can be used via a T2 mount to couple to any standard or digital SLR or via filter adaptors direct to the filter thread of digital compact cameras.

This ingenious adaptor puts Olivon at the forefront of digiscoping.
